These state-of-the-art solutions come in an exclusive, original form derived from Comelit's research and creativity, which minimises overall dimensions and maximises elegance and practicality. A "touch sensitive" monitor (3,5") to add some magic to your day, with every function programmable by simply touching the panel. Available in four different models for all design and operational requirements: wall-mounted, wall-mounted with tiltable monitor, flush mounted with a minimal 8mm overhang and as a table model with an elegant coordinated stand. Three different colours for three different life-styles and experiencing the world: Classic, Prestige and Trendy. In order to use the intercom function, the single-family kit must be expanded with one or more additional door entry telephones/monitors. The basic kit can be expanded to include up to 2 or more external units and 3 monitors per residential unit. Expandable up to 16 internal units with art.1252.
