

LG VM5BK Vehicle Reversing Kit

C/w VM5B monitor, VB163 camera, cables, mini DIN plugs

The VB163 camera and VM5B 5" monitor combine to produce an ideal solution to vehicle reversing safety. When the camera is positioned to the rear of a vehicle the driver has on-screen verification of any obstacles or hazards when reversing. The monitor has an automatic function with reversed picture feature that operates when the vehicle is placed in reverse.

Key Features

- Compact and rugged weatherproof camera c/w bracket and cable
- 5" plastic case monitor 12/24V DC
- High resolution 700 TVL
- Option to add additional camera with on-screen switching function.
- Reverse image switch
- Day / night switch for brightness compensation
